

PROJECT OVERVIEW:

Individuals with a military connection and their family members (IMCs) can look to a growing number of websites that attempt to provide information on a wide range of issues relevant to their needs. However, there is not a website that currently organizes information specific to the civil legal needs and legal remedies unique to this client population. This website is designed to meet that need. The website will serve as a national point of entry too accurate and effective legal information regarding high priority civil legal problems, in order to expand access to justice for IMCs and the individuals assisting them. The site will serve as a clearinghouse of information specific to those legal needs and will include the development of new content designed to bridge the gap between traditional military/VA services and those available to low-income people more generally.

In Development and launching in 2010
