Drupal for Legal Aid Websites
Open Source Template for the Legal Aid Community

About DLAW

Drupal for Legal Aid Websites (DLAW) is an open source website management system built specifically for legal aid organizations. DLAW is built using the Drupal content management framework. It includes:

- Drupal Core
- Recommended site configuration
- Selected and vetted community contributed modules
- National Subject Matter Index module
- Selection of pre-built themes
- More features

DLAW is developed and maintained by Urban Insight in collaboration with Legal Services National Technology Assistant Project, Idaho Legal Aid Services, and legal aid organizations from 11 states. Development of the OST Base was funded through a Legal Service Corporation Technology Initiative Grant.
